Step B: Decide how to invest

Make an all-in-one choice

Choose only one Make an all-in-one choice option at 100%. If selected, do not complete any other section in *Decide how to invest*.

The following investment options are asset allocation portfolios primarily consisting of a combination of bond-based and stock-based funds that correspond to a specific time horizon and risk profile. The mix or asset allocations of funds and other investments making up the portfolio (and owned by you) will change over time, becoming more conservative as you approach or progress through retirement.

Important information

Mutual funds in the *Lincoln Alliance*[®] program are sold by prospectus. An investor should consider carefully the investment objectives, risks, and charges and expenses of the investment company before investing. The prospectus and, if available, the summary prospectus contain this and other important information and should be read carefully before investing or sending money. Investment values will fluctuate with changes in market conditions so that, upon withdrawal, your investment may be worth more or less than the amount originally invested. Prospectuses for any of the mutual funds in the *Lincoln Alliance*[®] program are available at 800-234-3500.

The program includes certain services provided by Lincoln Financial Advisors Corp. (LFA), a broker-dealer (member FINRA) and an affiliate of Lincoln Financial Group, 1301 S. Harrison St., Fort Wayne, IN 46802. Unaffiliated broker-dealers also may provide services to customers.

Target date asset allocation portfolios are designed for investors planning to retire close to the year indicated in the name of the fund portfolio. The manager invests each asset allocation portfolio in accordance with an asset allocation between stocks (equity) and bonds (fixed income), which will become more conservative over time as the target maturity date draws closer and, following that date, as the investor moves further into retirement.

Target risk asset allocation portfolios are designed for investors with a specific risk profile. The mix of asset allocation of the underlying investments within the portfolio will reflect the risk profile indicated in the name of the portfolio. The manager invests each asset allocation portfolio in accordance with an asset allocation between stocks (equity) and bonds (fixed income), which will become more conservative over time.

Asset allocation portfolios' mixture of investments is designed to reduce the volatility of investment returns while still providing the potential for higher long-term total returns that are more likely to be achieved by including some exposure to stocks. The principle value of the asset allocation portfolios will fluctuate with market conditions and is not guaranteed. Asset allocation does not ensure a profit nor protect against a loss. There is no guarantee that the portfolio will achieve its objective or provide adequate income at and/or through retirement, nor does it assume or require a participant to take retirement income while invested in the retirement allocation portfolio. Plan distributions/withdrawals will reduce the investment balance, and future returns are not earned on amounts withdrawn. Past performance is not a guarantee of future results.

The retirement allocation portfolios are designed for investors who are retired or about to retire. Assets in time-based asset allocation portfolios that reach maturity are automatically transferred to corresponding retirement allocation portfolios.

The retirement allocation portfolios' mixture of investments is designed 1) to generate retirement income and preservation of capital, and 2) for growth that outpaces inflation. The principal value of the retirement allocation portfolios will fluctuate with market conditions and is not guaranteed.

There is no guarantee that a particular portfolio will provide adequate income at and/or through retirement, nor does it assume or require a participant to take retirement income while invested in the retirement allocation portfolio. Retirement allocation portfolios are not designed to provide for plan distributions/withdrawals over a set period or to guarantee return of principal. Plan distributions/withdrawals will reduce the investment balance, and future returns are not earned on amounts withdrawn. The retirement allocation portfolio may not be appropriate for all plan participants. As with any asset allocation portfolio, there is no guarantee that a portfolio will achieve its objective. A portfolio's underlying funds' share prices fluctuate, which means you could lose money by investing in accordance with the portfolio allocation. Past performance is not a guarantee of future results.
