

State Street Global All Cap Equity Ex-U.S. Index Non-Lending Series Fund Class K

30 June 2024

State Street Global All Cap Equity ex-U.S. Index Non-Lending Series Fund Class K ("Class K") represents units of ownership in the State Street Global All Cap Equity ex-U.S. Index Non-Lending Series Fund (the "Fund").

The Fund seeks to offer broad, low cost exposure to stocks of companies, ranging from small to large cap, in developed and emerging countries excluding the United States.

Investment Objective

The Fund seeks an investment return that approximates as closely as practicable, before expenses, the performance of the MSCI ACWI ex USA IMI Index (the "Index") over the long term.

Investment Strategy

The Fund is managed using an "indexing" investment approach, by which SSGA attempts to approximate, before expenses, the performance of the Index over the long term. SSGA typically will attempt to invest in the equity securities comprising the Index, in approximately the same proportions as they are represented in the Index. Equity securities may include common stocks, preferred stocks, depository receipts, or other securities convertible into common stock. Equity securities held by the Fund may be denominated in foreign currencies and may be held outside the United States. In some cases, it may not be possible or practicable to purchase all of the securities comprising the Index, or to hold them in the same weightings as they represent in the Index. In those circumstances, SSGA may employ a sampling or optimization technique to construct the portfolio in question. A Portfolio may also invest in the securities of Chinese companies, normally restricted to residents of the People's Republic of China (commonly known as "A Shares" or "China A Shares"), through the Stock Connect program or other channels.

From time to time securities are added to or removed from the Index. SSGA may sell securities that are represented in the Index, or purchase securities that are not yet represented in the Index, prior to or after their removal or addition to the Index. SSGA may also utilize other pooled investment vehicles, including those managed by SSGA and its affiliates, as substitutes for gaining direct exposure to securities or a group of securities in the Index. The Fund may at times purchase or sell index futures contracts, or options on those futures, or engage in other transactions involving the use of derivatives, in lieu of investment directly in the securities making up the Index or to enhance the Fund's replication of the Index return. The Fund's return may not match the return of the Index.

SSGA may implement the Fund's asset allocations through investments in investment pools (which may, but will not necessarily, be registered under the U.S. Investment Company Act of 1940, as amended) managed or sponsored by SSGA or an affiliate. Because of the unit issuance processes employed by the various underlying investment pools, allocations by the Fund to certain pools on a given trading day may be invested in such pools at the next trading day's net asset value per unit. This will result in the portion of the Fund's assets being invested in such investment pools being held in cash for the trading day and may result in increased tracking error. This could adversely impact the return to any investor.

Performance

Total Returns	Fund*	Benchmark
Q2 2024	0.93%	0.92%
YTD	5.38%	5.28%
1 Year	11.38%	11.57%
3 Year	0.40%	0.19%
5 Year	5.81%	5.62%
10 Year	4.12%	3.92%
Inception to Date (31 Mar 2011)	4.53%	4.31%
Best Year Since Inception (2017)	28.12%	27.81%
Worst Year Since Inception (2022)	-16.33%	-16.58%

The returns are provided in accordance with the description of the Fund's* total expense ratio information that can be found on the last page under the Fee Disclosure section. Performance returns for periods of less than one year are not annualized. **Past performance is not a reliable indicator of future performance.** Current performance may be lower or higher than the performance shown above. Fund returns reflect all items of income, gain and loss and the reinvestment of dividends and other income and are calculated in US dollars. Index returns are unmanaged and do not reflect the deduction of any fees or expenses. Index returns reflect all items of income, gain and loss and the reinvestment of dividends and other income.

Growth of \$10,000

The hypothetical \$10,000 investment chart is plotted quarterly, and includes reinvestment of dividends and capital gains. There is no direct correlation between a hypothetical investment and the anticipated performance of the Fund*.

Key Facts

- Managed using an indexing strategy
- May use futures and other derivatives
- May invest in other investment pools, including those managed by SSGA and its affiliates
- The Fund is not leveraged
- Will not sell securities short

*Class K funded on 30 June 2015. The Fund performance information shown above prior to 30 June 2015 is that of Class A of the Fund. The performance information prior to 30 June 2015 has been adjusted to reflect the Total Annual Operating Expense Ratio of Class K. However, performance of Class K if funded during this period may have been different. See the Fee Disclosure section on the last page for a complete description of the Total Annual Operating Expense Ratio of Class K.

The Fund is a collective investment trust managed by State Street Global Advisors Trust Company (SSGA), and is not a mutual fund. The Fund is not FDIC insured, nor is it an obligation or deposit of, or guaranteed by State Street Corporation, SSGA or its affiliates.

The MSCI ACWI ex USA IMI Index is a free float-adjusted market capitalization weighted index that is designed to measure the equity market performance of developed and emerging markets.

The MSCI ACWI ex USA IMI Index is a trademark of MSCI Inc.

This fact sheet provides summary information about the Fund. It should be read in conjunction with the Fund's applicable Strategy Disclosure Document, which is available upon request. The Strategy Disclosure Document contains important information about the Fund, including a description of a number of risks associated with investing in the Fund.

If your account holds Russian securities and instruments, then as of the date of this publication, they have been fair valued. Such fair value may be zero. If your portfolio holds such Russian securities and instruments, then the portfolio may not be able to dispose of such securities and instruments depending on the relevant market, applicable sanctions requirements, and/or Russian capital controls or other counter measures. In such circumstances, the portfolio would continue to own and have exposure to Russian-related issuers and markets. Please refer to your portfolio holdings report.

Certain supplemental information may be rounded and may result in the total not adding up to 100.

The top holdings are presented to illustrate examples of the securities that the Fund has bought and may not be representative of the Fund's current or future investments. In the case of fixed income and cash funds the securities are aggregated and shown at the issuer level. The top holdings do not include other assets or instruments that may be held by the Fund including, for example and not by way of limitation, cash or cash equivalents and derivatives such as futures, options and swaps. The figures presented are as of the date shown above, do not include the Fund's entire investment portfolio, and may change at any time.

The portfolio turnover rate is as-of the prior fiscal year-end ("FYE"). It is calculated consistent with Form N-1A by dividing the lesser amounts of purchases or sales of portfolio securities (i.e., underlying Fund shares) for the fiscal year by the monthly average value of the portfolio securities owned by the Fund during the fiscal year.

Portfolio characteristics are calculated using the month end market value of holdings except, if shown, for beta and standard deviation which use month end return values. Averages reflect the market weight of securities in the portfolio. Market data, prices, and dividend estimates for characteristics calculations provided by FactSet Research Systems, Inc. All other portfolio data provided by SSGA. Characteristics are as of the date indicated, are subject to change, and should not be relied upon as current thereafter. Sector reporting based on the Global Industry Classification Standard ("GICS") which was developed by and is the exclusive property and a service mark of MSCI Inc. ("MSCI") and Standard & Poor's, a division of The McGraw-Hill Companies, Inc. ("S&P") and is licensed for use by State Street. Effective October 1, 2018, GICS renamed the "Telecommunication Services" sector to "Communication Services", which resulted in the sector reclassification of some companies.

Important Message About Risk

For institutional / professional investors use only.

Investing involves risk including the risk of loss of principal. Equity securities may fluctuate in value and can decline significantly in response to the activities of individual companies and general market and economic conditions. Generally, among asset classes, stocks are more volatile than bonds or short-term instruments. Stock values fluctuate in response to the activities of individual companies, the stock market and economic conditions. At times, the risk level of the Fund may be greater than that of the U.S. stock market in general. Investments in emerging or developing markets may be more volatile and less liquid than investing in developed markets, and may involve exposure to economic structures that are generally less diverse and mature, and political systems which have less stability than those of more developed countries. Investing in foreign domiciled securities may involve an increased risk of capital loss from unfavorable fluctuation in currency values, withholding taxes, differences in generally accepted accounting principles and economic or political instability in other nations. In addition, the Fund may use derivative instruments which may involve risks such as potential illiquidity of the markets and additional risk of loss of principal.

Risk Management

SSGA monitors the overall risk of the Fund, to seek to avoid unintended risk relative to the Index. SSGA manages portfolio characteristics and transaction costs in a manner intended to provide a return as close as practicable to the benchmark return.

Fee Disclosure

The Fund seeks to achieve its investment objective by making direct investments in securities or by making investments in other investment funds, including those managed by SSGA and its affiliates ("SSGA Funds"). The Fund indirectly bears a proportional share of the fees and expenses of the SSGA Funds in which the Fund invests ("Indirect Expenses"), which may include, among others, Fund's administration, investment management, audit, index and legal fees of the SSGA Funds. Additionally, the Fund incurs direct fees and expenses ("Direct Expenses"), which may include, among others, the Fund's administration, investment management, audit, index, service and legal fees. For Class K, the investment management fee is included in the Direct Expenses. The Indirect Expenses combined with the Direct Expenses form the Total Annual Operating Expense Ratio ("TAOER"). The TAOER of Class K will equal .07% annually. You should contact your Plan Administrator for a complete description of the fees and expenses applicable with Class K units of the Fund, including the shareholder servicing fees.

Transaction costs (including, for example, brokerage costs, and taxes, if any) are not reflected in the TAOER but are reflected in the net performance returns of the Class K units of the Fund. In the ordinary course, the investment manager does not assess Transaction Charges in connection with the purchase or redemption of units of the Fund. To the extent the Fund invests in one or more SSGA Funds, the Fund itself may incur such Transaction Charges as a result of such investment, which will be reflected in the Fund's net asset value.

The following example is intended to help illustrate the impact of fees and expenses associated with an investment in Class K units of the Fund based on its TAOER. It is intended to illustrate the hypothetical cumulative expense that you would incur over various time periods if you were to invest \$10,000 in Class K units of the Fund. This example assumes that the Fund provides a return of 5% a year and that operating expenses of the Fund remain the same. The results apply whether or not you redeem your investment at the end of the given time period.

Example Fees: 1 year - \$7.17; 3 years - \$22.60; 5 years - \$39.58; 10 years - \$89.92

The example outlined above does not represent the actual fees and expenses of the Fund. Actual fees and expenses may be higher or lower than those shown.

Fees and expenses are only one of several factors that participants and beneficiaries should consider when making investment decisions.
